SEASONED PROJECT MANAGER, CRITICAL INFRASTRUCTURE (PMP CANDIDATE) • AI DATA CENTER & POWER INFRASTRUCTURE • BUSINESS DEVELOPMENT

PROFESSIONAL SUMMARY

Seasoned project manager for critical infrastructure with 27+ years of experience bringing digital systems into traditionally analog operations — from designing a firm's first in-house network in 1999, to introducing LiDAR and GPS-based workflows through the 2000s, to leading a full digital transformation at Symmetry Land Survey, to today's AI data center and power infrastructure due diligence at TRC Companies. Proven track record leading utility, transmission, battery energy storage (BESS), and solar infrastructure feasibility work for TRC, Jacobs, and major California utilities. Combines technical/geospatial depth with hands-on project management, budget ownership, systems modernization, and client-facing business development.

CORE COMPETENCIES

AI Data Center Site Due Diligence • Power Sector Infrastructure (Transmission, BESS, Solar, Grid Interconnection) • Digital Transformation & Systems Modernization • Project & Program Management • Business Development & Account Management • Shareholder Engagement & Communication • Budget & P&L Ownership • IT/Network Infrastructure Implementation • Subcontractor & Vendor Coordination • ALTA/NSPS Land Surveys • CAD/GIS/LiDAR/GPS Systems • Cross-Functional Team Leadership

PROFESSIONAL EXPERIENCE

TRC Companies, Inc.

Aug 2024 – Present

Survey Manager — AI Data Center & Power Infrastructure Due Diligence

- Lead technical due diligence and site feasibility assessments for AI data center construction projects within the power sector, evaluating utility pipelines, transmission lines, grid interconnection points, battery energy storage systems (BESS), and solar generation sites.
- Manage ALTA/NSPS surveys and feasibility deliverables supporting hyperscale data center site selection and development timelines.
- Hold budget responsibility across multiple concurrent site assessments; coordinate and oversee subcontractor teams to keep projects on schedule and on cost.
- Serve as a business development leader, building and maintaining client relationships that drive account growth across AI infrastructure and power-sector clients.

Jacobs

May 2023 – May 2024

Senior Engineering Project Manager (Consulting Engagement)

- Engaged as a senior project management consultant supporting utility infrastructure initiatives for SoCalGas, Southern California Edison (SCE), and PG&E.
- Provided project management, technical surveying, and feasibility support across multi-utility infrastructure programs.
- Coordinated cross-functional teams and subcontractors to deliver against client timelines within the power/utility sector.

Symmetry Land Survey, Inc.

Mar 2020 – Present (concurrent)

Principal & Founder

- Founded and operate a multi-office California land surveying firm serving all 58 counties, delivering ALTA/NSPS land title surveys and construction staking to title companies, general contractors, developers, and attorneys.
- Led a full digital transformation of the business — designed and implemented an integrated software stack (CRM, automated lead routing and intake, invoicing, and client booking) that replaced legacy analog workflows end-to-end.
- Drive business development and account management, building the client pipeline (Pipedrive CRM) and lead-generation systems that grew the firm's book of business.
- Own all financial, operational, and technical aspects of the business, including budgeting, P&L, and staffing.

David Evans & Associates

May 2016 – Mar 2020

Business Development Leader

- Served as business development leader for the survey department, building and maintaining client relationships across commercial, public transportation, and utility sectors to drive proposal wins and account growth.

- Led proposal development, cost estimating, and client billing review as core parts of the department's business development pipeline, backed by direct financial and personnel management responsibility.
- Directed survey operations and staff across business verticals, and implemented management and safety programs firm-wide.
- Led project management for large-scale commercial construction, public transportation, and utility infrastructure projects, mentoring field and office staff and coordinating field support for 10+ union crews.

ADDITIONAL EXPERIENCE

Cannon Corporation — *Survey Manager*, Mar 2015 – May 2016

Psomas — *Project Surveyor*, Mar 2014 – Mar 2015

Designed and deployed a real-time GPS monitoring network for high-rise building movement control.

Collision and Injury Dynamics, Inc. — *Professional Land Surveyor | Consultant | Expert Witness*, Jan 2011 – Mar 2014

Led the roadmap and implementation of 3D laser scanning and digital data-capture workflows into the firm's forensic surveying practice.

Symmetry Surveying + Mapping — *Principal*, Oct 2008 – Jan 2011

Mollenhauer Group — *Director, 3D Surveying + Mapping*, Apr 2004 – Oct 2008

Introduced LiDAR, GPS, and digital software systems across the firm's business processes.

BaseLine Land Surveyors — *Project Manager*, Nov 1999 – Apr 2004

Designed, launched, and administered the firm's first in-house network and systems infrastructure across all offices.

TECHNICAL SKILLS

Digital Tools & Web Stack: Salesforce, Jira, Cloudflare Workers, Formspree, Pipedrive CRM, Cal.com, Paycove, web development fundamentals, systems administration, AI fluency across multiple platforms (Claude, ChatGPT, Copilot)

Geospatial & CAD: AutoCAD Civil 3D, MicroStation (limited), LiDAR, UAV, point cloud processing (ReCap Pro), Leica Cyclone, Carlson, Trimble Business Center

Platforms & Productivity: Windows, macOS, Linux, Microsoft Office, Adobe Suite, Bluebeam

CREDENTIALS & PROFESSIONAL AFFILIATIONS

California Licensed Professional Land Surveyor No. 8503

PMP Candidate

CLSA | California Land Surveyors Association

NSPS | National Society of Professional Surveyors
